## Fabrinet Expands International Business Development Team

BANGKOK, Sep 14, 2011 (BUSINESS WIRE) -- [Fabrinet](#) (NYSE:FN) announced today that it has expanded its international business development team with the appointments of Richard Vincent as vice president of North American business development and Greg Reny as senior director of business development. Both individuals will be based in the U.S., focusing on Fabrinet's aggressive growth objectives in the region. Fabrinet is a provider of [precision optical](#), electro-mechanical and [electronic manufacturing services](#) to original equipment manufacturers of complex products.

"We are pleased to have two such seasoned business development professionals join our team," said Dr. Harpal Gill, president and COO of Fabrinet. "Richard and Greg will help us address the growing business opportunities we see in the North American market as well as strengthen our customer relationships in the region."

Richard brings more than 18 years of experience in electronic manufacturing service business development with a proven record of building significant and successful partnerships with major original equipment manufacturers throughout North America. Most recently he served as vice president of ODM (original design manufacturing) business development at Foxconn. Prior to Foxconn he held the position of vice president and general manager at ODM manufacturer Ambit Microsystems, Inc. Greg is a contract manufacturing industry veteran with more than 20 years of experience leading new business development for some of the world's largest contract manufacturers. Greg joined Fabrinet from Flextronics, where he was director of business development for the industrial market.

### About Fabrinet

Fabrinet provides precision optical, electro-mechanical and electronic manufacturing services to original equipment manufacturers of complex products, such as optical communication components, modules and sub-systems, industrial lasers and sensors. Fabrinet offers a broad range of advanced optical and electro-mechanical capabilities across the entire manufacturing process, including process design and engineering, supply chain management, manufacturing, final assembly and test. Fabrinet focuses on production of high-complexity products in any mix and any volume. Fabrinet maintains engineering and manufacturing resources and facilities in Thailand, the People's Republic of China and the United States. For more information visit: <http://www.fabrinet.com>.
